Contents of Volume 10

No. 1, July 1989

Formate growth and pH control by volatile formic and acetic acids in batch cultures of methanococci
N. L. Schauer and W. B. Whitman (USA) 1

Differentiation of yeast species, and strains within a species, by cellular fatty acid analysis. 1. Application of an adapted technique to differentiate between strains of *Saccharomyces cerevisiae*
O. P. H. Augustyn and J. L. F. Kock (Republic of South Africa) 9

Continuous turbidometric measurements of microbial cell density in bioreactors using a light-emitting diode and a photodiode
R. P. Cox, M. Miller, J. B. Nielsen, M. Nielsen and J. K. Thomsen (Denmark) 25

Multiwell most-probable-number method for determining death kinetics of salmonella immobilized by entrapment in agar
D. M. Curran and T. J. Montville (USA) 33

A comparison of the abilities of 15 media to recover viable yeast from pond, river and lake water
J. P. Sherry (Canada) 39

Dialysis culture of *Euglena gracilis*
P. Gualtieri, L. Barsanti and V. Passarelli (Italy) 47

Staphylococci adherence test for serodiagnosis of amoebiasis
S. C. Parija, S. Kasinathan and R. S. Rao (India) 53

No. 2, September 1989

Simple enzymic method for isolation of DNA from diverse bacteria
S. Visuvanathan, M. T. Moss, J. L. Stanford, J. Hermon-Taylor and J. J. McFadden (UK) 59

Effect of dilution buffers on cell viability of *Zymomonas mobilis*
S. E. Buchholz and D. E. Eveleigh (USA) 65

Comparison of methods for the evaluation of the oral microbiota of mice
L. Rodrigue, D. Marion, L. Trudel, C. Barthe and M. C. Lavoie (Canada) 71

Monitoring sulfate-reducing bacteria: comparison of enumeration media
R. S. Tanner (USA) 83

Rapid enumeration of viable bacteria by image analysis
A. Singh, B. H. Pyle and G. A. McFeters (USA) 91

Laboratory procedure for determining substrate removal rate coefficients for biofilms
D. L. Lewis, J. D. Pope, Jr., D. K. Gattie and W. A. Said (USA) 103

The freezing of marine sediment for subsequent extraction of adenosine triphosphate
F. C. Dobbs and P. A. LaRock (USA) 113

The use of unicellular soil green algae for insecticide bioassay
M. Megharaj, K. Venkateswarlu and A. S. Rao (India) 119

Computer-enhanced darkfield microscopy for the quantitative analysis of bacterial growth and behavior on surfaces
J. R. Lawrence, D. R. Korber and D. E. Caldwell (Canada) 123

Measurement of phospholipid fatty acids at picomolar concentrations in biofilms and deep subsurface sediments using gas chromatography and chemical ionization mass spectrometry
A. Tunlid, D. Ringelberg, T. J. Phelps, C. Low and D. C. White (USA) 139

No. 3, November 1989

The control and measurement of 'CO_2' during fermentations
N. M. Dixon and D. B. Kell (UK) 155
A rapid bioassay for the activity of the anti-rhizobial peptide, trifolitoxin
E. W. Triplett and R. D. Vogelzang (USA) 177
A method for the differential microscopic enumeration of *Halobacterium* cells
A. Oren (Israel) 183
Fatty acid uptake by ciliated protozoans analyzed by flow cytometry
E. S. Kaneshiro, S. F. Reuter and L. Trinkel (USA) 189
Purification of plasma membranes from different cell types of *Zygosaccharomyces bailii*
E. Herzberger and F. Radler (FRG) 199
The value of assay repetition in epidemiological studies
D. T. Dunn, J. Vadivelu, R. G. Feachem, B. S. Drasar and N. P. Cox (UK) 207
A total-recycle expanded-bed bioreactor design which allows direct headspace sampling of volatile chlorinated aliphatic compounds
J. J. Niedzielski, R. M. Schram, T. J. Phelps, S. E. Herbes and D. C. White (USA) 215
A spectrophotometric micromethod to assess polymorphonuclear leukocyte migration induced by bacterial chemotactins in a multi-microwell Boyden chamber assembly
P. A. Fontán and D. O. Sordelli (Argentina) 225
A permeabilized cell assay system for studying enzyme regulation and localisation in *Aspergillus niger*
J. Cordewener, R. Busink and J. Visser (The Netherlands) 231

No. 4, December 1989

An in vitro ^{51}Cr release assay for *Ascaris suum* infective larvae
H. E. Laubach (USA) 241
Improved method for simultaneous determination of alcohols, volatile fatty acids, lactic acid or 2,3-butanediol in biological samples
M. J. Teunissen, S. A. E. Marras, H. J. M. Op den Camp and G. D. Vogels (The Netherlands) 247
Rapid culture-independent techniques for quantitation of *Chlamydia trachomatis* elementary bodies
S. T. Knight, V. R. Neece and D. J. Witt (USA) 255
Kinetic measurement of bacterial adherence to eukaryotic cells
A. L. Smith, P. D. Jenny, L. Langley, P. Verdugo, M. Villalon, J. Unadkat and D. Luchtel (USA) 265
Purification of *Thiobacillus ferrooxidans* cultures by single colony isolation and influences of agarose on the colony morphology
A. Das, S. Bhattacharyya and P. C. Banerjee (India) 281
Some practical aspects of measurements of betaines and their sulphur analogues by the use of HPLC
O. A. AL-Almoudi and A. Y. Ali (Saudi Arabia) 289
A rapid simple procedure for direct measurement of excreted thiamine from yeast
Y. Haj-Ahmad, I. Russell and G. G. Stewart (Canada) 297
Application of the spiral plating method to study antimicrobial action
A. S. Wallace and J. E. Corkill (UK) 303
Rapid determination of amino acid concentrations in microbiological media: evaluation of Borchers' cuprizone method
P. H. Janssen and H. Barea (New Zealand) 311
